## Remote Examinations

Remote Examinations provide an voice stress analyst service combining and interviewer process though communications through a distant analyst function.

Provided by an certified interviewer at one location and a certified voice stress analyst at another, both connect by the internet.

Remote examinations are used for 2 main reasons, Either you have attended only the interviewer course and is not certified as a as an Examiner. .

The second reason you would be interested in this is maybe your not 100% sure of a case that you have done and need another opinion.

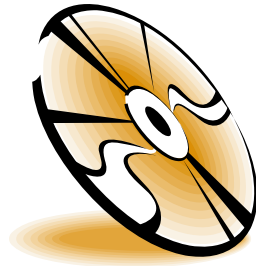

## Lost Security Device

A USB port Security device is provided to secure access to the T&DVSA™ Software Program. Without the USB device you will not be able to use the system. This USB is included in the purchase of the T&DVSA™ System. Our Warranty provides for replacement of a non-operating USB, But does not provide for loss without a penalty

## Compatible Laptop Computer

### (Recommended operating systems)

Computer Type: Notebook

Type of Use: Ultra-Portable

Processor

Type: Intel® Core™ 2 Duo Processor

T5500

Speed: 1.66GHz

Front Side Bus Speed: 667MHz

L2 Cache: 2MB Advanced Smart Cache

Technology: Intel® Centrino® Duo Mobile Technology

Hardware:

Keyboard: QWERTY, 86 keys with 2.5mm stroke and 19.05mm pitch

Memory : Type: DDR2 , Installed: 2GB (1GBx2) PC2-4200 ,Maximum: 2GB

Hard Drive; Capacity: 160GB , Interface: Serial ATA

Battery Type: Lithium-ion Battery (VGP-BPS2C)

Estimated Battery Life: TBD hours (Standard Battery)

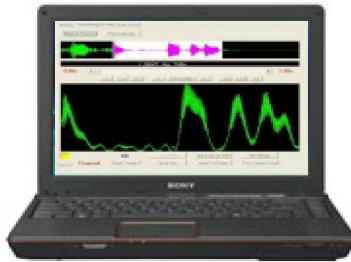

Windows 2000/XP/Vista

USB Port(s): 2 (2.0 compliant)

Port Replicator Connector(s): 1

Audio

Sound System: Windows® sound system compatible

## T&DVSA™ System Software

### T&DVSA™ Digital Voice Stress

Analysis™ Systems provide a relatively new way to measure physical response to psychological stress. This unique technology combined, with a well-trained examiner, an analyst, and a series of structured verbal, psychological cues, known as test protocols provides accurate, repeatable and dependable results. Unlike the polygraph it can achieve its conclusions without the intense, often demeaning pre-test, and the physical discomfort of the polygraph test itself. Recording the subjects voice for analysis can be accomplished face to face, remotely using the telephone, by call center routines, and even covertly Universal, when used in the culture and language of the subject.

The initial investigative tool developed, The LanternPro™, was a technically superior truth and deception application running on computers using most 16 bit

Microsoft operating systems, Windows 3.01– Windows 95,98. Which is also for sale For less then the new, but be sure wit will work with the computer standers.

Our second generation—T&DVSA™ a 32 bit processor matching improvements in Mircosoft technology as provided by Microsoft XP, Home, and Commerical, as well as MS 2000

Thus the T&DVSA™ is a 32 Bit, Digital Software Program is now provided to the customer on CD with a USB Security Key to preclude unauthorized use.

## Interviewer Training class

### Certified Interviewer Training.©

The cost and time required to accomplish Truth & Deception Technologies LLC Digital Voice Stress Analysis (T&DVSA)™ examinations via the Truth & Deception Technologies LLC Distance Processing System™ is facilitated by a person trained in appropriate protocol selection, pre-test, and testing components of a total TruthTec, Inc. Digital Voice Stress Analysis (T&DVSA)™ examination. The Case file, T&DVSA™ test data and audio will then be transmitted to the T&DVSA™ web page for processing 24 hours a day. Training classes are held periodically in different parts of the country, to provide interviewing skills in voice stress analysis. These classes require 3 days of classroom instruction plus independent guided study. Strict adherence to test protocols provide basis for international applications.

- Three Day Course
- Study Guide
- Complete LanternPro™ Interviewer Manual
